

H2S Neutralizer

SmarterSolutions+TM

H2S Scavenger

Description

Tested and approved by several refineries as an acceptable replacement for triazines, H2S Neutralizer is a blend of revolutionary chemistries developed to neutralize hydrogen sulfide (H2S). It contains no triazines or amines, nor does it contain or produce any formaldehydes. H2S Neutralizer is also tested and approved by several pressure pumping (fracturing) companies for use with their fracturing fluids.

Sizes: Call for sizes

Product Features

Non-toxic to humans and aquatic life, H2S Neutralizer contains no hazardous ingredients. It is non-corrosive; environmentally friendly; completely safe for personnel to handle; safe to the environment (biodegradable); produces no precipitates; does not promote scaling; passes harmlessly through pumps and filters; and bonds with / removes iron sulfide. CO2 has limited effect on H2S Neutralizer. Simple application methods - no expensive capital equipment required. It outperforms all other scavengers in loading efficiency and it is a very cost competitive option for H2S treatment.

Application

Fracking	Trucking & haulage
Scrubbers	Storage tanks
Abandonments	Work overs
Municipal sewage	Tailing ponds

Physical Properties

Appearance:	Clear
Odour:	None
pH:	9.3-9.5
Specific Gravity:	1.06
Biodegradability:	Complete per OECD 301D

- ✓ Environmentally Safe
- ✓ Biodegradable
- ✓ Non-Flammable
- ✓ Phosphate Free
- ✓ Non-Acid
- ✓ No CFC's
- ✓ No VOC's
- ✓ Non-Corrosive
